Carroll L. Tyler, Manager
Santa Fe Operations Office
Shields Warren, M.D., Director
Division of Biology and Medicine, Washington
FINANCING OF BIOLOGY PROGRAM - ENIWETOK

R

September 23, 1949

REFER TO
SUBJECT: BMM:HAS

In connection with the forthcoming weapons test this Division has expressed willingness to participate with the Division of Military Application and the NNE in a somewhat extensive biology experimental program. As a result of several discussions with those concerned in this matter it has been agreed that the extent of the financial participation of Program 6000, Biology and Medicine, will be $300,000 in F.Y. 1950 and $600,000 in F.Y. 1951 (this latter amount being included in the F.Y. 1951 budget) for a total participation of $900,000.

It is our understanding that these funds will be used for operational costs including the establishment and care of an animal colony at the site, etc., and that an equivalent amount is to be furnished by the Division of Military Application for necessary construction. It is also our understanding that the National Military Establishment will render such funds and services as they are able to.

We are, therefore, requesting the Division of Finance to transfer $300,000 in F.Y. 1950 Cash Appropriation to your account for this purpose. It is desired that a record be maintained of obligations and expenditures against this amount in sufficient detail as will enable future analysis of cost of performance.

cc Div. of Military Application
Div. of Finance
Mr. Herbert Miller, SFOO
Dr. O.V.LeRoy, Biol. &Med.Div.
