Dr. Thierson –

No such World Health Annual Statistics – & no breakdown for Pacific Islands, Oceania, Micronesia, Polynesia etc.

Demographic Yearbook – latest we have is 1974 & this is all I can find. The key to the disease is found on 706 – for example, B 18 is "malignant neoplasms & neoplasms of unspecified nature." I know I've failed you – I'm sorry. Try L.C. (Library of Congress)
