Tokyo, Japan
10 [illegible]

Dear Mr. Cannon;

I must say my apology at first that I didn't write for long time to appreciate for your kindness and great assistance for me and for your warm hospitality towards at your office.
Please, forgive me.

I have been very busy since I returned to Tokyo.
Because, I have to work hard at Hospital so I was absent for 7 weeks and I had to translate TV program script into English for the purpose of send to Dr. Cornish, then I had to write an article on some Magazine.

[illegible]
T.V. [illegible]
Contents of [illegible] was
unsatisfactory because [illegible]
of activities of Medical Team
was very very small quantity.
If I could say frankly to you,
I have misdeem to selected
T.V Director to made such document
T.V film because Mr. [illegible] is
so young and he is a not good
director which is made such
long film documentary, and also
he was double-crossed me
about promise of making film
before we left Japan between
I and him.
I am very disappointed.
I should have had to take
other director with me, it would
had better.

I would like to let you know the
most important effect of movie

5009788

film on air on T.V.
I found out one fact that we have never seen any news and articles about Bikini victims and even exposed peoples of Marshallese at all.
Two young exposed Marshallese who were exposed at Rongelap Island and they are living at Ebeye Island now had come to Japan to have physical examination at Nagasaki by invitation of Japanese Radical Group and recommended by Congress of district of Marshall Islands on middle of May. This News was reported on almost news paper in Japan and also even in English News paper of Japan. But, it was complete nothing of announcement of about them when they have left Japan. Because, our movie film was on air on T.V. already.

5009789

And my article was published on June in all over the [illegible] that no one can not [illegible] and announcement about exposed people of Marshall Islands at all.

Because, I have been in Marshall Islands joining with U.S. medical Survey Team and I took examination in physically in my hand and saw by my eyes in the fact.
And I know why political confusion were happened at Marshall Islands, also I know very well about character and mental construction of Micronesia people because I have ever been Micronesia for more than 7 times.
Many Marshallese requested to me that should be come again in next year with medical Survey Team of U.S.A, and joining of me in Survey Team makes more friendly, makes increasing good relationship between medical

Survey Team and Marshall peoples also exposed people.
This will make good results for the friendship and cooperation in future, between U.S and Micronesia, as they said to me. I think, this is true.
The relationship between medical Team which has been conducted by Dr. Conard and Marshallese have been so long time for 22 years, so they likes to have examination from different kind of doctor especially Japanese because Micronesia peoples were Japanese for 32 years ago.
Sometimes, people likes to have examination by different kind of physician and this is common psychological phenomenon in practice at this world, I think.

Also, I must tell you very interesting story about the people

5009791

of exposed Islands in Marshall Islands.

① Exposed people who ~~were~~ are living at Rongelap and Utirik and almost people who are move to Ebiye Island are very friendly, co-operative deeply appreciation and deeply trust to U.S. Medical Survey Team.

But, on the other hand, leader of Island who were not born in any exposed Islands and who has never live in such Islands also who ~~were~~ were given monthly salary from U.S. government and also, then, people who are living at exposed Islands, Rongelap, Utirik Island for only couple years because they have moved from its other Islands where

there are located very far from exposed Island for the purpose of the living with their Kith and kin to eat and for their life.
Such leaders and people who are coming from the other Islands are always make confusion and make troubles also against medical Survey Team.
It is very strange because they were not exposed and also even they have never worrying about over the exposed people on physical condition from their genuine heart, only they are explain and complain also making confusion on politically.

There is very strange, interesting custom at Marshall Islands. If a people and family found their or his relation or even very far Kith and kin at some

5009793

Island in spite of it is located
too far distance from their home,
he or they will move to such Island
for the purpose to live and to get
at their relation who are working
as usually ordinary same as very
few people in the Islands.
And he or his family to be cut up
or he no longer able to make
living with their relation then
they will find another relation
at another Island.
So always they are moving to
Island to Island to eat and to
live they depend upon their
relation for support.

So by such reason, it is very
difficult to find one person
or patient at the next year if
I saw one person at a Island.

So Dr. Conard have much
troubles to find one patient

5009794

at several occasions, I need.
Could you understand for a
my meaning of it.

I should like to tell you more
but I must stop to write at
this time.

I have been waiting Mr. Liverman
when he have come to Japan
but I couldn't make to see
him. It was very disappointed.
please tell him when you
see him.

Well, I like to say again
Thank you very much for
your kindness and warm
hospitality when I was your
office and Washington.

I hope, I should like to see
you again in recently very
much.

5009795

Please, tell my appreciation to the people who were arranged movie film showing at film showing room at your building.

I hope, you will have nice summer vacation.

Best Regards;

Chikao Hayakawa
