55 South Grand Avenue
Pasadena, California

Attention: Mr. T. E. Carpenter, Contracting Officer

Dear Sir:

We sincerely appreciate your September 18, 1958 letter permitting Cooper Development Corporation to use LOKI loading and processing equipment for the benefit of our AEC work.

The purpose of this letter is to request your approval of Jet Propulsion Laboratory loaning Cooper Development Corporation necessary loading and processing tooling to enable Cooper to fabricate and have loaded RTV motors should tests which will occur in the next few days prove that RTV motors are necessary for our program.

As stated in previous correspondence and conversations, time is of the essence in execution of our Subcontract 108 with Cooper Development Corporation under our Prime Contract W-7405-eng-48 with the Atomic Energy Commission.

It is my understanding that Mr. Gordon Kautz of Jet Propulsion Laboratory has advised Cooper Development Corporation that the requisite tooling is available and loan of the tooling at this time would cause no hardship.

Your prompt approval will be appreciated as the available time would not allow us to produce the necessary tooling with which to accomplish loading and processing should the RTV units prove necessary. In addition, a considerable savings will result to the Government in avoiding duplication of tooling.

Very truly yours,

C. L. Blue
Assistant Business Manager
