1. Launchers. It is estimated that in the [illegible] the launchers have cost [illegible] more than originally budgeted. It was [illegible] to modify 6 launchers, fabricated for the Plumbob Program, and design and manufacture an additional 18 launchers similar to the Plumbob launcher with the exception that a longer rail was to be [illegible]ed. Actually, it was determined [illegible] launcher re-design was necessary [illegible] would be located very near the [illegible] therefore should be capable of a quick [illegible] from horizontal (during [illegible]) [illegible] mined azimuth and elevation [illegible] before rocket firing. [illegible] see the original 6 [illegible] following 18 were [illegible] enable them to be [illegible] controlled and set [illegible] automatically [illegible]

California and in the desert area. [illegible]
by quantity in excess of [illegible]
to be necessary [illegible]
of the system.

4. EPG Field Tests. As [illegible]
our cost projection to [illegible]
ing the present field [illegible]
1958. This was [illegible]
of dollars [illegible]
field crew will be in [illegible]
initially planned. It [illegible]
original [illegible]
