DECLASSIFIED PER DOE
LETTER DATED JULY, 15, 1994
FROM ANTON SINISGALLI TO
DIANE S. NIXON

405994

TO: General Superintendent, Supply

JOB: 942

FROM: Acting Resident Engr.

RE: Weather Station Generators

DATE: 22 June 1957

R

Attached is a copy of a letter received by this office from the Superintendent of the Electrical Department through the General Superintendent Construction-Maintenance, for your review and action.

I fully concur with Mr. Prouty's recommendations, as set forth in his letter, which will simplify the electrical distribution systems at the old weather stations where it is now intended to use the 15 KW single phase units.

We therefore recommend that Mr. Prouty's suggestion of the purchase of additional 60 KW, 3 phase units be adopted if at all possible.

not feasible [illegible] to use the generators [illegible] electrical engineer to determine feasibility of making the double distribution system.
