RE: STATION [illegible]

DATE: 11 September 1953

Forwarded for your information is one (1) copy of Mr. I. B. McDaniel's memorandum of 8 September 1953 regarding changes to drawings for Station 1200 which were not identified by appropriate revision notes.

It is always difficult and generally productive of delay to incorporate changes on work in progress. With all concerned on the alert, we have been fortunate to minimize such delays thus far. However, where a drawing change is made and the revision is not noted on the drawing, it becomes virtually impossible to pick it up in time, and quite unlikely that it will be noticed at all.

We would appreciate your efforts, when changes to approved drawings become necessary, to properly identify these changes by an appropriate revision note on the drawing.

R. A. Boettcher
