Major John D. Servis
Headquarters, JTF 7.1
Los Alamos Scientific Laboratory
J-Division
P. O. Box 1663
Los Alamos, New Mexico

Dear John:

I hope this reaches you before you make your change of station.

According to the exposure records for CASTLE there are listed eleven TG 7.1 weather station personnel on Rongerik Atoll who received about 40 roentgens. It is my understanding that there were twenty-five Air Force personnel (plus the three Army personnel) on Rongerik. Will you straighten me out on this? What was the exposure of the twelfth man of TG 7.1 who received twelve roentgens, and do you know the circumstances under which this occurred?

Best wishes on your new assignment.

Sincerely,
