

Office Memorandum • UNITED STATES GOVERNMENT

TO : Merril Eisenbud, Manager, NYOO

DATE: December 26, 1956

FROM : Gordon M. Dunning, Health Physicist *GMD*
Biophysics Branch, Division of Biology and Medicine

SUBJECT: RESURVEY OF PACIFIC AREAS

SYMBOL: BMBP:GMD

We are currently drawing together the highlights of the various data from the radiological surveys of the Marshall Islands in the Pacific, the first draft of which was sent you a few weeks ago. In writing up the acknowledgments, we wish to be sure to give full credits to all of the many persons who contributed to these efforts. It seemed to me that the best way to do this was to ask each of the laboratories concerned to indicate briefly the names and credits for their individuals. It is intended that the final draft of the report will be submitted to each laboratory concerned before publication.

Would you please return the first draft that was sent you.
