Dr. Paul B. Pearson
Chief, Biology Branch
Division of Biology and Medicine
US Atomic Energy Commission
Washington 25, D.C.

Dear Dr. Pearson:

Your telephone conversation of July 5th and letter of July 6th both pertaining to the proposed Bikini-Eniwetok survey for this summer have caused us to re-orient our thinking and plans into other channels of research. An opportunity will now be provided for an inventory of our past efforts and the resumption of some of the projects we have had to abandon during the past years because of insufficient man-power and facilities to continue with them.

It is hoped, during your visit of next month, that we can discuss our entire field of research with respect to the program of the Division of Biology and Medicine.

We have forwarded to you, through the Hanford Operations Office, two copies of the "Radiobiological Survey of Bikini, Eniwetok, and Likiep Atolls - July-August 1949".

This summer should prove helpful in future planning for resurvey in the Bikini-Eniwetok Area and the extent of our participation in future testing programs.

Very sincerely yours,

Lauren R. Donaldson
