Dear Walter,

Based on items submitted to me by Dr. Korean at Ebeye and Dr. Grant the following is a list of equipment that could be used at the hospital at Ebeye:

- ✓ Proctoscope/sigmoidoscope (old rigid tube type or newer fibre, optic type)).
- Spirometer (for respiratory function)
- ✓ Laryngoscope (Laryngo View or Laryngo Vu)
- ✓ X-ray View box - 5 or 6
- X-ray dryer
- ✓ D & C instruments (Hagen dilators, currettes, etc).
- Orthopedic splints
- ✓ Wood lamp (hand held, fluorescent light)
- ✓ Cystoscope
- Ophthalmoscope
- ✓ Lumbar puncture kits
- Heat lamp
- Resuscitation kit
- Minor surgery kit
- Examination Table
- ✓ Suction pump
- Drainage pump
- Carrying tray
- ✓ Microscope dark field attachment
- " phase "
- Everset & Jennings Whirlpool foot bath
- Walton Thera-mist
- Heating pads
- Bed pans
- Fracture bed pan
- Daral breast pump
- Ear syringe
- Toman oxygen tent canopies
- Miscellaneous surgical instruments (forceps, scissors, hemostats, etc.)
- Thoracentesis trays

There were many more items including drugs, stains, etc. that Masao Korean listed, but which I do not feel should be requested.

I appreciate very much your help in this matter.

Sincerely,

Robert A. Conard, M.D.

RAC:gc

P.S. I have put check marks by items which are more badly needed.
