

TO: GENE BARRETT

FROM: WM. MORRISON, TRAVEL

FOR YOUR INFORMATION: PROGRESS REPORT ON DR. CONARD'S GROUP - #7

1. Drs. Knudsen, Lowrey, Rall and Sutow drove in from Waimanalo and were met at Hickam before 0600 hours on Wednesday, 24 February. This early check-in permitted them quick access to the weigh-in scales. They had breakfast, shopped at the Base Exchange at Hickam for a few small items (which is permitted upon showing a boarding pass) and then availed themselves of the DV Lounge at the Terminal.
2. Excess clothing and a suitcase were turned over to us and are now stored in Mr. Joe Dryden's closet in AEC trailer no. 17. These items will be picked up at approximately 0100 hours on Saturday, 20 March. Blood samples which the group had collected on the previous day are being stored in the freezer compartment of No. 2 refrigerator in the Lounge trailer No. 16 until these gentlemen return.
3. Dr. Knudsen requested that one blood sample for a calcium analysis be turned over to Tripler Hospital as soon as possible. This was delivered to the sixth floor laboratory at the Medical Center at 0900 hours on Wednesday. Dr. Lowrey requested that a pair of reading glasses be delivered to a Rongelap resident who is now a student at the East-West Center. The glasses were delivered at noon on Wednesday so the student could be found in his room at that time.
4. Dr. Knudsen and Dr. Rall asked us to make reservations for their return flight from Honolulu to New York and Washington. All four Doctors commented on the help we had been to them during their visit.
5. This will be the last progress report on Dr. Conard's group until they start to return from the Marshall Islands.
