Dr. Shields Warren, Director  
Division of Biology and Medicine  
U. S. Atomic Energy Commission  
Washington 25, D. C.

August 6, 1948

R  
From  
NMB-N

Dear Chief of Naval Operations  
Room 2063 Navy Department

Washington 25, D. C.  
Enclosed is our resurvey of the Bikini and Eniwetok areas. The program as outlined for Bikini last spring (UMI-1) was completed ~~last fall~~ <sup>July</sup>, as is occupied and sufficient data gathered that it will now be possible for us to evaluate the changes that have taken place to thank the Navy Department on behalf of the Atomic Energy Commission for the splendid cooperation in supporting

~~the biological resurvey of Bikini and survey of Eniwetok~~.  
The ~~fall~~ under the guidance of Dr. Charles Donaldson we could work in the field each day. Collections were made in each collecting area with the efforts of Commander Charles B. Marwell, USN, and Captain drying. Navy support of the expedition and Lieutenant Joseph Schmidt, USN, in the capacity of Navy liaison officer, contributed substantially to the successful completion of the expedition's objectives.

The period from July 21 to July 30 was spent at Eniwetok where we collected ~~upon submission of a report to the Commission by Dr. Bourdage~~ were in the ~~Commission~~ <sup>July</sup> under the guidance of Dr. Donaldson, we will contact the Navy Department, subject to the ~~of~~ <sup>of</sup> required clearance by other interested offices ~~with~~ <sup>in</sup> sampling ~~the~~ <sup>the</sup> Commission, in connection with a possible joint press release ~~on~~ <sup>on</sup> the expedition. frozen, dried, and chemically preserved samples for continuing our study at our laboratory.

Sincerely yours,

The counting of the activity contained in the samples is getting underway. As fast as counts are made and the data analyzed we will prepare summary reports ~~and~~ <sup>for</sup> you.

**BEST COPY AVAILABLE**

Shields Warren, M. D.

It is entirely too early to predict Director, Division distribution of the radiation products, it does seem to ~~biology~~ <sup>biology</sup> and Medicine been a shift of active materials to radiation into the land mass and into the vegetation. Some ~~and~~ <sup>and</sup> Military Liaison Committee plants and animals to study the amounts contained ~~in~~ <sup>in</sup> Division of Military Applications

General Manager

The Public and Technical Information ~~Information~~ <sup>Information</sup> during this and previous years' expeditions with J. J. Schmidt, will be a very herculean task. We hope that on your return <sup>you</sup> will visit our laboratory so that we may review Commander Charles B. Marwell, you that will contribute to an understanding Lieutenant J. J. Schmidt, USN
