

# Office Memorandum • UNITED STATES GOVERNMENT

TO : Brig. Gen. Alfred D. Starbird, USA,  
 Director of Military Application, AEC Washington

FROM : *James E. Reeves*  
 James E. Reeves, Assistant Manager for  
 Test Operations, USAEC, Albuquerque

SUBJECT: WANDENBERG - ENIWETOK PROPOSED MISSILE SHOTS

DATE: DEC 29 1959

SAB20006426A001

SYMBOL: ALT:JER-2601

Attached is a report by James Sugden of this office covering a SAC meeting held at Kirtland regarding a program to fire ICBM Atlas missiles from Vandenberg to Eniwetok Atoll.

It is strongly recommended that, before such a program is approved, the AEC be fully briefed on the guidance system and the dependability of the missile accuracy. It was Mr. Sugden's feeling that the SAC personnel present at the meeting were under the impression that AEC approval was not required.

We have learned through our contractor, Edgerton, Germeshausen and Grier, Inc., at Las Vegas, that the target will be in the lagoon area with personnel and equipment stationed on the island. They felt that there would be no particular hazard associated with the shot, as the target would probably be missed by miles. The warhead is to contain only a small number of pounds of HE and will be detonated in the air. Apparently detonation techniques applied will assure the burst will occur at an altitude commensurate with safety.

It is suggested that SAC be contacted at the Washington level for clarification of this program.
