MANAGEMENT OF EV PROGRAMS IN THE MARSHALL ISLANDS AND PALOMAROS

EV Office and Division Directors

BEST COPY AVAILABLE

After such discussion with staff and outside observers, I have concluded that the EV programs in the Marshall Islands and Palomares need a focal point in EV for scientific and management coordination. Effective immediately, I am asking Dr. Bruce Bachholz to assume the duties of coordinator.

While the responsibility for the direct management of the several EV projects will remain with OHER and OESD, Dr. Bachholz will be responsible for assuring the full coordination of the overall planning, integration, and implementation of EV's programs in Headquarters and in the Field. He will further insure that EV's programs are consistent with and adequate for DOE's commitments and are fully coordinated with DOD, DOI, EPA, etc.

In fulfilling this function, Dr. Bachholz will assure (a) that conflicting resource priorities are resolved, (b) that the logistical requirements of the Marshall Islands programs are set and coordinated, (c) that all necessary scientific, technical, and managerial advice is obtained and appropriately dealt with, (d) that public and Congressional interests are addressed (working with Carl Elliott and George Shepherd), and (e) that Hal Hollister is kept currently and fully informed on all aspects of the EV program in the Marshall Islands and Palomares. Finally, Dr. Bachholz will serve as the principal EV point of contact with the existing Northern Marshall Islands Advisory Group and will recommend to the group that it justifiably supersede their charter.
