Dear Ted:

I have just returned from Eniwetok to find your letter concerning the openings in your Department. You have done a good job in the letter, and I have no doubt but that applications by the dozen will result.

I am passing the information along to Dr. Norman G. Anderson at Oak Ridge who took his degree with me. Anderson is very well situated there and is not anxious to move. At the same time I hope that he may wish to make application to your Department both because he is an excellent man and because of the fine associations he would have there. We shall see.

You may be interested to know that the Atomic Energy Commission is seriously considering setting up a marine biological station at Eniwetok. This peculiarly advantageous location would offer excellent opportunities for marine studies. I talked with Ted Bullock briefly at the Cornell meetings about this and am writing him at this time to give further details.

Sincerely,

Karl M. Wilbur
Physiologist, Biology Branch
Division of Biology and Medicine
