R

Chief Project Engineer Weight of Materials - Various Stations

May 10, 1954

In accordance with your request by Engineering Message 7370, we are attaching engineering work sheets covering the weight estimates for various materials used in the construction of Stations 20, 40, and 50. The electrical material estimates cover materials above grade, except for Stations 20 and 50. Twenty percent of the electrical materials used in Station 20 were below grade, while thirty percent of the materials used in Station 50 were below grade.

Please return the attached work sheets to this office when you have finished with them.
