The following information was received by LASL letter J-18980 dated July 16, 1953 and is forwarded to you for action. No further action will be taken by the home office.

"The user, E340, of the 8-man work tent near the base of Station 1301, Site Elmer, requests that adequate precautions be taken to prevent water accumulating on the floor of this tent, as the flat area in the region of this tent is easily flooded during rains.

The user will accept a tent with a raised wooden floor if it is impracticable to raise the concrete floor high enough above the grade to prevent flooding.
