RE BEACHING CONDITIONS AT BIKINI ATOLL

DATE: 11 March 1953

*PH*  
*Howell*

Enclosed is a copy of a request from Ehiwetok Field Office regarding beaching conditions at Bikini Atoll which is self-explanatory. It is suggested that a tabulation of Atoll Islands be made showing location of landings and tide conditions required for each type of boat. Those Islands where beaching is impractical should be so noted. This information will be used for determining accessible locations of Scientific Structures.

This work should be accomplished by an Engineering Work Order and charged to the following accounts:

- 6713 - Engineering Design
- 5213 - Field Engineering
- 4313 - Construction
