

Enclosure 2 Content

Office of Environmental Management - Safety system oversight program assessment reports for Carlsbad Field Office, Idaho Operations Office, Oak Ridge Office, Office of River Protection, Richland Operations Office, and Savannah River Operations Office. These reports, supplemented with corrective action status and/or SSO qualification status to reflect the current conditions are forwarded as an acceptable alternative to a separate listing per the Board's letter.

National Nuclear Security Administration – Enclosure 1 contains the status of training, qualification, and staffing of Federal safety system oversight personnel.

Reporting requirements in the Defense Board Letter dated March 27, 2006:

- The current list of vital safety systems at each site, as well as the contractor systems engineer and Federal safety system oversight personnel assigned to each system.
- The status of training, qualification, and staffing of Federal safety system oversight personnel for vital safety systems at each site. For those sites that have completed the Safety System Oversight Assessment, submission of this assessment is acceptable if it represents the current status of the site.
- The activities performed to institutionalize the vital safety system assessments at each site, including the dates of the last assessment and the schedule for performing the next assessment for each vital safety system.
