

RESULTS OF SURVEY ON SNL/NM INTEGRATED EDUCATIONAL SERIES ON
SUSTAINABLE DESIGN

SURVEY QUESTION	YES RESPONSE	NO RESPONSE
Was the IES useful ?	37	0
Would you like to see the workshops continued?	36	1
What is the most convenient time?		
AM	3	N/A
NOON	32	N/A
PM	2	N/A
Which Workshop(s) was the most useful?		
SD Overview	9	N/A
Site Considerations	7	N/A
Commissioning	13	N/A
Energy Efficiency	8	N/A
Materials and Recycling	5	N/A
Water Conservation	7	N/A
Indoor Environmental Quality	7	N/A
All	11	N/A
What subjects would you like to see in future workshops?		
Case studies of existing SNL buildings	35	N/A
USGBC LEED Workshop	2	N/A
Repeat of Series for others	9	N/A
SD Video's	13	N/A
Who else should attend future workshops		N/A
Facility Management	17	N/A
Future Line Customers	19	N/A
DOE Federal Project Managers	15	N/A

SPECIFIC COMMENTS (Responder identified where known):

1. It was informative. It provided additional insight to what I had previously learned.
2. Very informative
3. SNL is to be congratulated for one of the best educational series that I have attended. (A/E/C)

4. The applicability is across the board, the broader the understanding the stronger the institutional commitment to implementing the processes. Perhaps some modeling of the extent of the impact relative to energy use short and long term at the Lab could be undertaken. During the next several years 100,000 sq. ft.. plus of new building /lab will be coming on line, an evaluation/projection could compare existing to new. (A/E/C, DWL Architects)
5. I went to two of the workshops and found them to be very interesting.
6. Excellent organization and topics for discussion. Thanks to the team.
7. I feel the sessions were well organized, to the point, and very informative. Thanks to all involved for putting this together
8. Thank you both for the series, and allowing my attendance...Sessions I attended were very informative and useful. (Larry Miller, NM State General Services Dept.)
9. I didn't attend all of the sessions. Do we have any LEED certified projects at SNL? If so, was there a general feeling that it was worth it?
10. This was a great introduction and provided good background information. I would like to see it continue with specifics projects. I am interested in a more detailed analysis of the costs and benefits of the various design and construction features of LEED. The cost should include any additional design and documentation expenses. (A/E/C, Bridges and Paxton)
